Yoemen Take Double Defeat From Fired Up Panthers

Cameron's Yoemen went down in back-breaking defeat Friday night to the Rosebud Panthers 14-7.

The Yoemen owe their defeat almost entirely to one big Rosebud tackle named Dennis Casner. Casner smothered practically every Cameron play and at one time was largely responsible for the Yoemen having the ball on fourth down with 43 yards to go.

The Yoemen also ran out of luck in the Rosebud gym after the game. On the toss between the three teams tied for district champs to see who would represent them, the Panthers again came up victors.

Rosebud scored early in the first quarter, aided by one of many Cameron fumbles for the night. After the Panthers failed to make progress on their first series of downs, Jimmy Bethel punted to Yoemen Jimmy Rettig standing on his goal line. He moved to the four where he was hit hard and he fumbled into the hands of an alert Panther. Billy Allen carried twice to the one, from which point Randolph Burton blasted right tackle for the touchdown. David Curz made a perfect conversion.

It was a repeated exchange of punts until midway of the secon period when Cameron gathered up a head of steam. From their own 46, the Yoemen staged a sustained drive for their only score. Leon Beale, Jimmy Rettig and W. K. Leonard alternated down to the Rosebud 14. From there Rettig hit center and went all the way untouched. Junior Zotz converted to knot the count. The score was 7-7 at half-time.

There was no score in the third quarter, but the Panthers opened the fourth with a bang. From the Cameron 43, Bethel hit O'Neal with a strike to the 35. Wasserman went wild at this point and finally smashed over from the one to break the knot. Cruz converted successfully again.

The Panthers were threatening on the Cameron 15 when the final whistle sounded.

Jaycees Erect City's Street Decorations For Holiday Season

Much help and assistance was given by Chamber of Commerce president Richard Moseley and Mr. Earl Moseley of Moseley Electric Company. Much credit is due these men for being willing to donate an afternoon's work to help make the Christmas season a more colorful and happy event for the children, the people of Cameron and the surrounding area.

These decorations are also a reminder that the annual Christmas Parade will soon be here. Organizations that plan to enter a float in the parade have only until November 28 to secure an official entry blank from the Chamber of Commerce office. Boys and girls ages 8 to 12 who plan to enter the bicycle decoration contest must also have their entry blank turned in by this time.

A large crowd was in the TV audience to watch the program. The Cameron ladies spoke highly of Cameron and Milam County and especially the football team and when asked the question, "What's Cameron going to do about the Rosebud game tonight," they answered, "We're gonna beat 'em!

Beef Purchase Program Announced By County Agent

The Extension Service has been asked by the National Advisory Committee of the Commodity Credit Cooporation to assist in fully acquainting the ranchers and farmers throughout the U. S. with the Departments efforts to help the cattle situation.

Salient features of these efforts, developed through counsel with representatives of all segmens of livestock industry, Members of Congres, and others, are as follows:

1. The Department's beef purchase program has been stepped up to acquire the Maximum amount of beef that can be readily disposed of through both domestic and foreign outlets, other than through normal trade channels. The amount contemplated to be purchased is 220 to 225 million pounds, or the equivalent of more than 750,000 head of cattle.

2. These purchases have been and will continue to be made from the grades of cattle that need price bolstering the most, namely the lower grades.

3.Purchases are timed to bolster the prices of these grades when they need it the most - primarily October-December. Although some actual deliveries of products are scheduled for later periods, all cattle purchased to fill the contracts being let must be slaughtered in the coolers by December 15. It is estimated that the equivalent of between one-third and one-half of the cutter and canner cows marketed during the period October-December 15 will be required to supply canned beef for these Government contracts. These facts have considerable signifiance for those cattle owners who will be marketing cattle, before December 15, producing U. S. Commercial and lower grade carcasses.

Other efforts of the Department to stabilize the cattle situation, such as expanded credit facilities and the special programs for drought areas are now in effect.

Mrs. Alvin Henry has returned to her home in Pasadena, California, after several weeks visiting in the homes of friends and relatives in Cameron. Mrs. Henry is a former resident of Cameron and her many friends were happy to see her again.

The Missus Keeps Posted

Ever since our electricity was cut off last year on account of me forgetting to mail in the payment, the Missus has been sort of leery about giving me letters to mail.

At first she'd ask if I mailed them, then double-check my coat pocket at night. She stopped that, and I figured she was convinced I'd learned my lesson.

Then yesterday, I got a postcard at the office in a familiar handwriting. I turned it over and by golly it was from the Missus herself! It read: "Thanks, Joe, for mailing my letters." Well! Looks like she figured I *still* needed some checking-up and slipped that postcard in the last batch of letters.

From where I sit, an occasional check-up is a good thing. Check-ups on just how tolerant we are of other people's preferences and tastes, for example. I like a glass of beer with supper, you may prefer cider—but if I ever try to switch you to my choice, simply "address" me with a reminder of your rights.

THE LITTLE RIVER PHILOSOPHER TAKES UNSCIENTIFIC STAND, OPPOSES NEW PLAN TO BOMB TORNADOES

Editor's note: The Little River Philosopher on his Johnson grass farm in Marlow takes an unscientific view this week but his views rarely ever prevail anyway.

Dear editar:

So far I haven't gotten that job I was writing about last week the one that would put me on the government pay roll as a weather invastigator to find out why the weather doesn't always follow the forecasts, but I am now convinced more than ever that the weather bureau needs a man of my caution and conservatism.

I was readin last night in a newspaper which I'd been savin to put on the springs under my mattress to keep the cold air from comin through that direction where a weather expert has figured out a system of destroyin tornadoes before they destroy cities by blastin em with a guided missile or an atom bomb.

As I understand his theory, a tornado can be blown to pieces with an explosive, and all you need to do is find out where one is, send out a guided missile to attack it, of fly an airplane over it and drop an atom bomb on it.

No doubt it's true maybe that if they'd explode an atom bomb over Waco when that tornado was hittin last spring, it would have wiped out the tornado. Of course the fact it would have wiped out Waco also ain't got anything to do with the theory. A scientific fact is a scientific fact.

Not bein a scientist, I'm not in a position to argue about this, but bein alive and wantin to stay that way, I believe I'd just as soon take my chances with a tornado as a guided missile or an atom bomb.

However, there's a lot to say in favor of the weather when it double-crosses the forecasters. It keeps life more interesting to can say life is more interestin just because you know a norther 's gonna hit tomorrow mornin at 10:30?

I know a man in a neighborin county who ain't what you'd call real bright. A few years ago he got himself a high powered radio and got interested in the weather forecasts. Bein curious natured, he didn't just listen to one station all the time, he dialed em all in, and frequently he'd tune in a station say in North Dakota and get the local weather report for up there. Not knowin it was a local report, he'd hear for example a blizzard was due that afternoon, and he'd come out of his house with an overcoat on and his ear flaps buttoned down, throw the feed to his cows, cover up his water pipes, haul in plenty of wood, and set out to warn his neighbors.

Finally he came to the conclusion the weather forecast were extremely unreliable and he quit listenin, dependin on geese and his corns.

Personally, I'm in favor of weather forecasts, but a man ought to retain enough independence to know what clothes to wear even when his radio is out of commission.

This November day in 1953 will be like any other to most people.

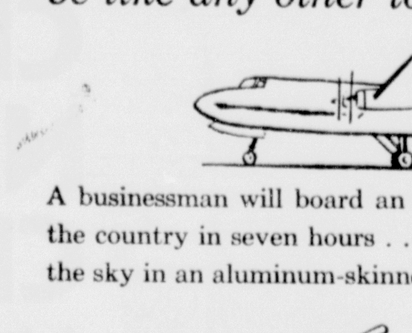

A businessman will board an aluminum airliner that will span the country in seven hours . . . even as his son in uniform cuts the sky in an aluminum-skinned military jet job.

A farmer will move lengths of light aluminum pipe from field to field to turn life-giving water into all his acreage . . . and increase his crops.

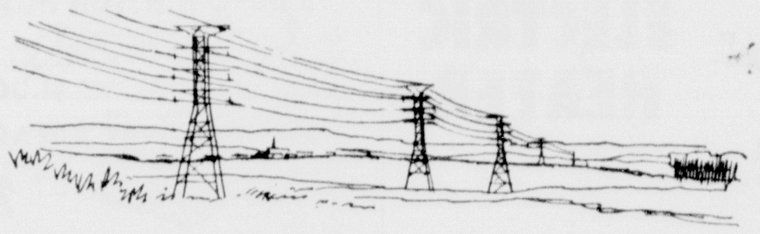

A freight-hauler will add up his savings since he switched to weight-cutting aluminum equipment . . . and a motorist will marvel at the power of the aluminum-pistoned engine in his car.

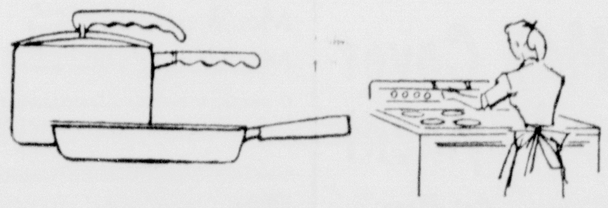

An architect will see his plans for beauty and efficiency take shape in the aluminum walls, windows, doors, wiring and pipe that he specified for a new building.

A child will turn on an electric light that gets its power over long lines of aluminum cable spanning America and reaching into the great metropolis and the isolated hamlet.

A housewife will take an aluminum-foil-wrapped package from her refrigerator and cook her family's dinner in aluminum pots and pans in a matter of minutes.

All these . . . and millions more like them . . . will be sharing the celebration of

ALCOA'S 65TH BIRTHDAY

It was just 65 years ago, on Thanksgiving Day in 1888, that Charles Martin Hall and Arthur Vining Davis poured America's first commercial aluminum in the original plant of what is now Aluminum Company of America. That was the beginning of Alcoa. It was also the beginning of the American aluminum industry. Today, aluminum benefits mankind through tens of thousands of products. Aluminum provides jobs for over 50,000 men and women at Alcoa alone . . . for over 1,000,000 throughout the industries that work with this modern metal. And the list of its uses is still growing.

Slavik And Lynch Lead Yoelets To Defeat Rosebud "B"

The Yoe High Yoelets B-Team defeated the Rosebud B in the final game of the season Wednesday night, November 18 in Rosebud.

Rosebud scored first in the first quarter when their quarterback heaved a pass to a Little Panther end, who romped the remainder of the distance to paydirt. The play started on the Cameron 26 yard line. The extra point try was missed.

Their second TD was a run play which went about 25 yards. The extra point was good, and Rosebud led at the half, 13-0.

The first Yoelet TD came late in the third quarter when Billy Slavik went three yards off tackle over the double stripe. Alton Witt set up the TD with his 33 yard romp. He was tripped on the three yard line.

The same play was used for the extra point with Slavik carrying the ball over on a run play

The second Yoe touchdown came in the fourth quarter with only four minutes and 8 seconds left in the ball game. Woodrow Lynch took a pitch out and stole around left end from the Rosebud 40 yard line for the six points. The extra point try was good with Slavik going over again.

Milam Wildcat Running Test

The Byrd Oil Company No. 2 M. Blakely, wildcat in Milam County, was at 7,806 feet Tuesday, where a drillstem test was being attempted.

Fifty feet of limestone with the bottom 12 feet showing a slight porosity and gas odor had been recovered on core at 7,740-90 feet. On a 2-hour drillstem test at 7,776-90 feet, recovery was 180 feet of gas cut mud, 100 ft. of oil and gas cut mud and bottomhole pressures were zero to 40 pounds, flowing, and 490 lbs. shut-in 30 minutes.

ELECTRICAL LOG WAS run to 7,790 feet, and the hole was cored 7,791-806 feet, recovering 15 feet of limestone, the top stains. On a three hour drill-four feet fractured, with oil stem test at 7,784-806 feet, recovery was 100 feet of gas cut mud, slightly oil cut, and a gallon of salt water. Bottomhole pressures were 40 to 50 pounds, flowing, and 820 pounds, shut-in 30 minutes.

A cement plug was spotted at 7,570-350 feet, and packer, set at 7,285 feet, failed on attempted drillstem test. Cement was drilled out to 7,745 feet for the present test.

This wildcat is in the A. J. Watts Survey, 3,000 feet southeast of the Byrd No. 1 Lucinda Greene, the county's only major producer, a gas-distillate dual well at 7,680-700 and 6,244-313 feet.

The Homer S. Head No. 1 Mrs. Lillian York will be perforated at 2,426-26 feet on Thursday. Pipe is set at 2,550 feet. Total depth 123,000 feet. This wildcat is in the Francisco Ruiz Survey, A-54, and in the J. McLennon Survey, A-249. It is about three miles west of the D. H. Byrd No. 1 Lucinda Green, dual deep gas-distillate discovery.

According to Voight, the committee, agreed unanimously to recommend to the Texas Interscholastic League that this action be taken.
